Date of publication :

March 2025

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or CINEA. Neither the European Union nor the granting authority can be held responsible for them. N° CONTRACT 101103667.

The European ENERGETIC project had its first Review Meeting at Luxembourg

INTRODUCTION

In **February 2025**, the ENERGETIC project reached a key milestone with its **first review meeting in Luxembourg**. All work packages were represented, and the presence of the **Project Officer, from the European Climate, Infrastructure and Environment Executive Agency (CINEA)** added significant value to the discussions. The meeting provided an **opportunity to review the project's progress, address ongoing challenges, and discuss any necessary adjustments** to ensure that the project stays on track to achieve its objectives and successfully complete its actions.

INSIGHTS FROM THE WORK PACKAGE LEADERS

Each **Work Package (WP) leader** took the opportunity to present **their progress and insights** during the review meeting. These presentations highlighted the **collaborative nature of the project** and underscored the **significant advancements** made in key areas, including **battery management system optimization, integration of renewable energy sources, and the development of scalable prototypes**. Leaders provided comprehensive overviews of their work, discussing challenges, solutions, and the next steps to further enhance the project's output.

CINEA's FEEDBACK ON ENERGETIC's PROGRESS

The **Project Officer** from **CINEA** **praised ENERGETIC** for its strong performance, particularly **highlighting the project's outstanding publications**. She noted the **high visibility and impact ENERGETIC** has within the research community, recognizing its **important contribution to advancing the field of battery management and energy storage**. During the review meeting, an opportunity was provided to evaluate the progress made so far, with each project partner presenting the advancements achieved within their respective work packages. **The Project Officer expressed satisfaction with the overall progress**, affirming that ENERGETIC is on track to meet its objectives and make **meaningful strides in the development of next-generation battery management systems**.

However, despite the progress, certain **areas for improvement were identified**. It was emphasized that addressing specific operational aspects is key to maximizing the project's impact. These **adjustments are crucial for ensuring that ENERGETIC meets all its milestones** within the established timeline and continues to drive toward its ambitious goals.
